

ROLLER SHUTTER MODULE

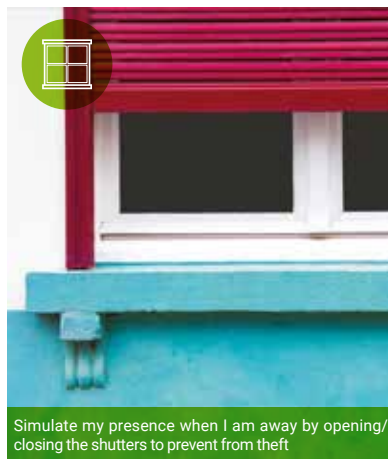

Add another wall switch to control my roller shutters far away from my roller shutter

Launch a scenario to automatically open my roller shutters to let the outside heat come in instead of switching my heating system ON

Launch a "good morning" scenario: open the roller shutters at only 20% to wake-up very softly

Simulate my presence when I am away by opening/closing the shutters to prevent from theft

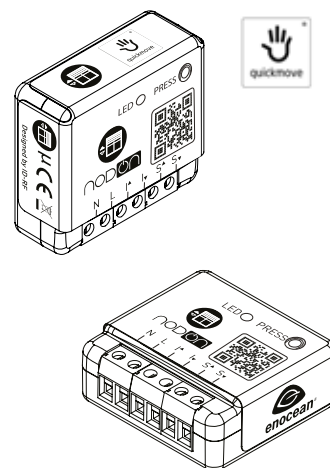

Launch a movie night scenario and automatically close my roller shutters when it's 9pm

TECHNICAL SPECIFICATIONS

Power supply: 230V AC 50Hz
Maximum motor power: 150W
Switching capabilities: 230V AC - 10A // 30V DC - 10A
Self-consumption < 1W
Operational temperature: 0°C to 40°C
Radio: EnOcean® protocol
Frequency: 868MHz bidirectional
EEP: D2-05-00
Range: 30m
Dimension: 40x44x16.9mm
