

The Mini Series Door and Window Sensor is delivered in standard mode with encryption turned off.

- Standard mode activation is indicated by the LED flashing once.
- Secure mode activation is indicated by the LED flashing twice.

The Mini Series Door and Window Sensor can be switched between standard mode and secure mode by pressing the learn button for at least 10 seconds. The devices mode will be changed when the learn button is released.

NOTE: Before changing the Mini Series Door and Window Sensors operating mode please make sure the device is removed from all receiving devices it has been configured to work with. Failure to do so could result in ignored telegrams.

Switching Between Modes

EnOcean's full security specification can be found on <https://www.enocean.com>

The Mini Series Door and Window Sensor includes an enhanced secure mode. When secure mode is turned on all device communication is encrypted by AES128. For more information, EnOcean's full security specification can be found on <https://www.enocean.com>

4. Secure Mode

Solar Powered Only
Prior to first use. The Mini Series Door and Window Sensor requires its power reserve charging this can be achieved by placing the sensor in illuminance of at least 200lux for a minimum of 5 minutes.

TECHNICAL SPECIFICATIONS	
Wireless Protocol	EnOcean
Measurement Range	Reports Open/Close
Transmission Rate (Dynamic)	Instant on Open/Close Else every 15 minutes
Battery Life* (Battery Back-up only)	Up to 10 Years
Battery Type (Battery Back-up only)	CR2354
Repeater	No
Telegram	1BS
Environment	Indoor
Enclosure Material	PC-ABS
Calibration	Factory Calibrated
Operating Temperature Range	-20°C to +60°C
Storage Temperature Range	-20°C to +60°C
Dimensions	76.5mm x 28mm x 17.5mm approx
Magnet Dimensions	62mm x 12mm x 13mm approx
EEP	D5-00-01

*Typical life expectancy of the battery is dependent on ambient light conditions and use-case.

Mini Series Door and Window Sensors equipped with a battery backup require turning on prior to first use. This can be achieved by opening the back cover and sliding the switch to the on position.

Solar Powered with Battery Backup

3. Product Activation

- Retrofit projects
- HVAC optimisation
- Activate alarms and notifications
- Used as a trigger for larger BMS
- Window and door status and notifications
- Transmits data wirelessly using the EnOcean® protocol

Typical Applications

- Reports open/close state of windows and doors
- EnOcean® security capable

Functionality

- Energy harvesting – powered by ambient light from the surrounding environment
- Battery variation, for robust operation in dark environments
- No wiring required – low cost of installation
- Fast installation time – minimal disruption for retro fits
- Optimal positioning – no wiring constraints

Features and Benefits

The Pressac Sensing Mini Series Door and Window sensor is a contact sensor that can sense when a door or window is opened or closed. The Door and Window sensor offers quick and versatile installation via adhesive film or screws. Once triggered the Door and Window sensor can activate a wide variety of potential responses.

2. Product Description

QUICKSTART-GUIDE

Mini Series Door and Window Sensor

1. Introduction

It is recommended that you read this Quick Start Guide carefully before using the Mini Series Door and Window Sensor.

This quick start guide contains relevant information for all variations of the Mini Series Door and Window Sensor. Please check which variation you have prior to use.

WARNING
Important information regarding risks.

NOTE
The section contains further information.

Health Risks

Use the device only for its intended purpose. The device is only suitable for indoor use. Avoid exposing the unit to moisture, dirt or dust. Avoid direct sunlight and other sources of heat.
Avoid placing the device in a metal case. Such placement will affect the ability to communicate with other devices. Do not open the device! In case of an error, please contact the manufacturer.

5. Commissioning

Adding the EnOcean Mini Series Door and Window Sensor to an EnOcean radio network.

NOTE: If including a Mini Series Door and Window Sensor in secure mode please ensure your receiving device is EnOcean security compatible.

1. Ensure your Mini Series Door and Window Sensor is within range of your EnOcean gateway or receiving device.
2. Place your EnOcean gateway or receiving device into inclusion mode.
3. Press the Learn button on the back of the Mini Series Door and Window Sensor the LED will blink once. The device will now transmit a teach in telegram.

4. Wait for the teach in process to end. Please allow extra time if using secure mode.
5. Successful inclusion will be indicated on the EnOcean gateway or receiving device.

The Mini Series Door and Window Sensor can also be included into your EnOcean network manually. This can be achieved using the unique EnOcean ID and the EnOcean Equipment Profile (EEP) of the Mini Series Door and Window Sensor. The EnOcean ID and EEP are printed on the Mini Series Door and Window Sensors product label.

6. Physical Installation and Positioning

Installation of the Mini Series Door and Window Sensor can be done using the adhesive pads or screws provided.

NOTE: The Mini Series Door and Window Sensor and the magnet should be no further than 5mm apart.

Adhesive Pads Installation

1. Ensure the surface is clean and dry. Use the included alcohol wipe to prepare the surface if required.
2. Stick the included self-adhesive pads to the bottom of the Mini Series Door and Window Sensor and magnet.
3. Peel off the self-adhesive pads protective film.
4. Stick the Mini Series Door and Window Sensor close to the edge of the door or window frame without hanging over. Ensure the solar panel gets as much light as possible.
5. Attach the magnet to the moving part of the door or window.

Installation Using Screws

1. Remove the screw from the side of the unit and lift the Mini Series Door and Window Sensor from its backplate.
2. Using the screws provided screw the Mini Series Door and Window Sensor back plate close to the edge of the door or window frame without hanging over. Ensure the solar panel gets as much light as possible.
3. Place the Mini Series Door and Window Sensor onto the backplate.
4. Replace the screw into the side of the unit and securely tighten.
5. Attach the magnet to the moving part of the door or window.

7. Changing the Battery

Estimated battery life using default settings assuming average use can be found in the technical specification section of this document. Changing the battery in the Mini Series Door and Window Sensor can be done by following the steps below.

1. Remove the screw from the side of the unit and lift the Mini Series Door and Window Sensor from its backplate.
2. Unplug the connected daughter board by gently lifting upwards.
3. Replace the battery in the battery holder.
4. Plug the daughter board back into the main board.
5. Place the Mini Series Door and Window Sensor onto the backplate.
6. Replace the screw into the side of the unit and securely tighten.

Declaration Of Conformity

Pressac Communications Limited (the original manufacturer) declares that the product branded

• Pressac Sensing Mini Door and Window Sensor - 868MHz satisfies the requirements of RED 2014/53/EU and has been independently tested and found compliant with the essential requirements of:

- BS EN 61326:2006 Electromagnetic Compatibility
- BS EN 60950-1:2006+A2:2013 Information technology equipment. Safety. General requirements

FCC Declaration

Pressac Communications Limited (the original manufacturer) declares that the product branded

• Pressac Sensing Mini Door and Window Sensor - 902MHz

Contains FCC ID: SZV-STM320U
Contains IC: 5713A-STM320U
Contient le module d'émission IC: 5713A-STM320U

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (i) this device may not cause harmful interference and (ii) this device must accept any interference received, including any interference that may cause undesired operation.

Japanese Radio Law

• Pressac Sensing Mini Door and Window Sensor - 928MHz

The enclosed device complies with Japanese radio law and is certified according to ARIB STD-T108. Operation is subject to the following two conditions:

(i) this device may not cause harmful interference and (ii) this device must accept any interference received, including any interference that may cause undesired operation.

Where applicable the original Certificates of Compliance are held at Pressac's business address, with copies being available on request.

Robert Smith, Technical Director, Nottingham, March 2018.
